👛 Practical Experience

Front-End Developer – Internship

📍 **Callidus 3.0** – Madrid, Spain / Porto, Portugal

📅 **Fev 2024 - Feb-2025**

- Development of interactive and responsive interfaces using **Angular** and **TypeScript**
- API integration and code optimization
- Implementation of reusable components and styling with **Bootstrap**
- Development of **web applications connected to APIs**
- Testing and performance improvements of web pages

Academic and Personal Projects

- **Restaurant system**, using **Flask** and **Jinja**
- **E-commerce website for T-shirt sales**, with **PHP** and **MySQL**
- **Landing Page for a bookstore**, with **HTML**, **CSS**, and **JavaScript**

- **Application for a major Spanish telecommunications company** using *Angular* and APIs (using *Postman* for testing) – A real project carried out during my curricular internship, not included in the portfolio due to data privacy policy.
